

The Power of We™

The Avaya Mobile Collaboration Solution for Small and Midsize Business

Give your people the tools they need to be more effective and productive, anywhere, on any device.

Faster collaboration— supporting employees with seamless communications and information sharing.

Smarter decisions— delivering the right information to the right people on the right device when it matters most.

Better business— providing the tools that enhance productivity and efficiency across your business.

We Understand Your Challenges

Operating efficiently. Staying close to customers. Carefully managing scarce resources. Focusing on what really matters. These are the hallmarks of small and midsize company success stories.

What they may lack in scale, growing companies make up for with innovation, determination, and by stretching resources. That's what makes them competitive and successful. That's also the reason why making smart use of the latest communication and collaboration capabilities has never been more important.

Mobility—the ability to do work from anywhere—is reshaping every aspect of business operations today, from sales to customer service to hiring and budgeting. To remain competitive, small and midsize companies need to match their communications to the new realities of the marketplace:

Enabling productivity:

By every estimate, the number of employees working mobile is increasing dramatically.¹

Is your business losing productivity (and sales) because employees lack the tools they need to work effectively from anywhere?

Satisfying customer service demands:

The new mobile environment is driving new standards for anytime, anywhere customer service.

Can your business deliver the response times that customers now expect?

Streamlining operations and reducing costs:

With so many mobility options available today, growing businesses are often spending on things they don't need or that don't work together.

How can your business unify and manage these tools to streamline your operations and keep expenses under control?

The Avaya Mobile Collaboration Solution for Small and Midsize Business is designed for the new realities of today's business environment, delivering a full range of communications capabilities—voice, data, video and more—in a single, scalable fully-integrated solution.

Let Avaya and our partners show you how we can connect your needs to our solutions.

You Can Count On Avaya

Market leadership: With 30 million users, Avaya is No. 1 worldwide in communications solutions for small and midsize enterprises (SMEs). More SMEs rely on Avaya solutions than those of any other vendor. More than 85 percent of Fortune 500 companies, the world's top 20 airlines, the top ten hotel groups, 70 percent of the largest banks and thousands of manufacturers, retailers, schools and more around the world rely on Avaya.¹

Technology leadership: Avaya stays No. 1 by focusing on state-of-the-art innovations in efficiency, collaboration, customer service and competitiveness. Open architectures, tight integration with business processes and breakthrough user interfaces—are just some of the attributes that have led leading analysts such as CRN Magazine, Frost and Sullivan and Gartner to single out Avaya as a leader in business communications solutions.²

Cost control: Avaya understands the realities of budgets and is an industry leader in lowering total cost of ownership (TCO) through solutions that reduce hardware requirements and support smart, cost-effective tools for ongoing management. For small and midsize companies in particular, independent analysts have declared Avaya nearly 25 percent less expensive in acquisition and ownership costs.³

1 Avaya calculations for the SME market based on Dell'Oro market share reports. Figure represents Nortel and Avaya users of Traditional Key, Hybrid PBX - Small and IP-PBX systems since 2003.

2 CRN Magazine, the leading publication of technology resellers, awarded IP Office its Tech Innovator 2010 Award; Gartner Magic Quadrant for Unified Communications 2011 (www.gartner.com); Frost & Sullivan selected Avaya IP Office as the 'European Enterprise Communications Product of the Year 2011'

Getting Mobile Collaboration Right

Mobile collaboration is all about bringing the right people together with the right information in the right context. Done correctly, mobile collaboration delivers measureable results in every aspect of your business:

Productivity on the go

I can see where my colleagues are and IM with them from my smart phone!

Having full access to the right communications capabilities can deliver significant upside impact on productivity. With the Avaya Mobile Collaboration solution, your employees can be productive anywhere. Having Avaya mobile collaboration software on any device makes it easy to move from smartphone to PC, to utilize voice or IM. Your employees get the tools they need to keep the conversation going. Your business benefits from the seamless communications that makes you more flexible, responsive and ultimately more profitable.

Keeping customers happy

If a client or customer contacts us now, there's always an immediate response.

Maximizing employee connectivity minimizes the missed or poorly-handled calls and e-mails that lead to

lost sales. Something as basic as allowing a call to ring simultaneously on multiple phones at one time (such as a mobile phone and desk phone) is a key way to keep sales and service people in touch. So is Presence, which provides at-a-glance information about who in your organization is available and how to reach them quickly. Being customer focused today is all about maximizing availability. Avaya makes it happen.

Streamlining business, lowering costs

The solution gave us numerous options for using mobile collaboration and see real bottom line impact.

In an unpredictable business environment, mobile collaboration technology gives you new options for streamlining operations and managing your bottom line. For example, smart use of video conferencing can give you new levels of flexibility in partnering, assembling teams and competing for top, full-time talent. Equipping your employees with tools to better manage workloads gives you more flexibility in staffing decisions. Avaya has worked with numerous small and midsize companies to realize direct bottom line savings in staff, call handling, travel, conferencing, hardware, system management and more, resulting in solutions with a return on investment of less than a year.

Advertising Firm Mobilizes for Collaboration

The need for smart collaboration led Schupp Company, one of St. Louis's top advertising agencies, to the Avaya Mobile Collaboration solution. Now Schupp employees can work from anywhere, easily integrating their mobile phones into the Avaya solution and also benefitting from a built-in conference bridge and state-of-the-art conference phones. "There's no comparison from what we had before to what Avaya gives us."

— Linda Schumacher, IT Director

Avaya Mobile Collaboration Solution

User Devices

A wide choice of desk phones, conferencing phones, wireless phones and video devices.

Mobility and Collaboration Applications

A full range of mobility and collaboration capabilities for anytime, anywhere productivity.

Infrastructure/Networking

Server: Avaya IP Office, a compact and highly scalable platform.

Data: Ethernet switches (10/100 and Gigabit), an integrated IP router, voice gateway services and wide-area networking (WAN).

Wireless: The Avaya 8100 Series WLAN Controller delivers a simplified wireless infrastructure designed for SMEs.

Multisite: Network multiple locations for speedier call handling, easy system management, resiliency/redundancy and cost savings.

Lower Your Costs

The Avaya Mobile Collaboration solution is the right choice for your bottom line:

- **Reduced mobile device minutes:** Route calls to and from your cell phone through the office and over WiFi.
- **Conference calling:** Make everyday conference calls affordable and practical without using outside conferencing services.
- **Real estate:** Get the flexibility to have extra staff working from home or hire ideally-qualified employees without requiring a commute or additional space in your office.
- **Lower long-distance bills:** Get options for better routing of calls between office locations and over broadband links.
- **Administration:** Manage and administer all systems without the need for outside service technicians.

Why Avaya

To realize the Power of We™, you need mobile communications tools that are comprehensive... intuitive. Rely on Avaya to make it happen.

- **Most cost-effective solution.** The Avaya Mobile Collaboration

solution grows easily with your business. Start with as few as five or 10 users and add as many as 384 on the same system—or up to 1,000 users across as many as 32 sites.

- **Best comprehensive value.** Get the built-in productivity of a 128-party conferencing bridge. Enjoy the

peace-of-mind of resiliency without the expense of redundant hardware.

- **Proven commitment to investment protection.** Move up to the latest capabilities in mobile collaboration while leveraging existing hardware, software and services.
