

Q-Combo Series Speaker Systems

Q-12A Combo and Q-15 Combo systems create a single source of sound using multiple Q-12A or Q-15 loudspeakers in acoustically difficult spaces when more than one speaker is required. Q-12A Combo systems are available in two or four Q-12A speaker configurations, with or without the Q-SB2 sub bass. Q-15 Combo systems are available in two or four Q-15 speaker configurations only.

Both systems feature superior performance from a single source at lower cost in larger spaces. Q-12A Combo systems that include a Q-SB2 create a single source of high fidelity, intelligible sound with deep, extended bass.

Also available is a Q-6 Club System, including four Q-6 loudspeakers, a Q-LB bass supplement speaker and a Q-CX electronic crossover. The package provides full frequency sound with extended bass for use in high end distributed systems, in spaces such as exercise clubs, sports bars and retail stores.

MODEL Q-12A COMBO KITS:

Model Q-Combo 2
Includes 2 Model [Q-12A](#) loudspeakers and BK2 Boom Kit
