

The Emergency Response Mass Message Emergency Notification/Business Continuity Planning Tool

Get the word out fast with VoiceGate's mass message delivery, business continuity and preparedness planning system. Scaling from 2 to 120 ports and capable of rapidly delivering thousands of messages to phones, e-mail, pagers and answering devices, The Emergency Response is the world's most affordable tool designed specifically to streamline the business continuity and emergency preparedness professional's job of identifying, planning, implementing, and practicing responses to emergencies of all kinds. Ideal for Civil and Public Alerts, roster fulfillment and bi-directional communication with emergency responders, The Emergency Response automated message delivery system even has its own personnel / employee database update and verification capabilities designed to keep responders contact information automatically up to date.

Teacher Assistant Emergency Automated Alert and Homework Notification Tool

Stand alone or as a bolt on module to our ICS automated attendant / voice mail / unified messaging system, the Teacher's Assistant streamlines communication between Educators and the parental community. Increase school and student safety with the Teacher's Assistant modules: Safe School, Absenteeism Notification, Homework Notification, Substitute Teacher booking, School and Emergency Closure and the Virtual Bell. The Teacher's Assistant is an automated predictive dialing notification system that connects directly to any school's absenteeism database and automatically dials and notifies to voice, e-mail and paging devices that a student has been absent using advanced text to speech technology.

Medical Assistant

Stand alone or as a bolt on module to our ICS automated attendant / voice mail / unified messaging system, the Medical Assistant streamlines communication and improves the bottom line in Dental, Medical, and Pharmaceutical offices. The Medical Assistant is an advanced automated appointment reminder, patient booking, prescription renewal and dosage reminder predictive / automated dialing system that interfaces with most clinic software programs.

Automotive Assistant

Stand alone or as a bolt on module to our ICS automated attendant / voice mail / unified messaging system, the Automotive Assistant streamlines communication and dramatically increases revenues to any car service or sales organization. Automated service appointment booking, recall notice, mass message announcement or customer surveys all improve the "touch" factor between the sales and service organization and their prospects, clients and customers. The Automotive Assistant is designed specifically to drive profit to the bottom line by improving customer satisfaction and reducing communication costs through its ability to interface with most automotive Customer Relationship Management software programs, record conversations, and track advertising campaigns.
